

## *Advice for Learning and Studying Chemistry*

1. Keep up with your studying day to day. 
2. Focus on your study.
3. Keep good lecture notes.
4. Skim topics in the text before they are covered in lecture.
5. After class, carefully read the topics covered in class.
6. Learn the language of chemistry.
7. Attempt all the example problems in the text and complete ALL homework.

**Bottom line...work hard, study effectively, and use the tools that are available to you.**
