

Polyatomic Ion:

a group of atoms that stay together and have a single, overall charge.

$\text{BrO}_4^{1-}$ Perbromate ion	$\text{BrO}_3^{1-}$ Bromate ion	$\text{BrO}_2^{1-}$ Bromite ion	$\text{BrO}^{1-}$ Hypobromite ion
$\text{CO}_4^{2-}$	$\text{CO}_3^{2-}$ Carbonate ion	$\text{CO}_2^{2-}$	$\text{CO}^{2-}$
$\text{ClO}_4^{1-}$	$\text{ClO}_3^{1-}$ Chlorate ion	$\text{ClO}_2^{1-}$	$\text{ClO}^{1-}$
$\text{IO}_4^{1-}$	$\text{IO}_3^{1-}$ Iodate ion	$\text{IO}_2^{1-}$	$\text{IO}^{1-}$
$\text{NO}_4^{1-}$	$\text{NO}_3^{1-}$ Nitrate ion	$\text{NO}_2^{1-}$	$\text{NO}^{1-}$
$\text{PO}_5^{3-}$	$\text{PO}_4^{3-}$ Phosphate ion	$\text{PO}_3^{3-}$	$\text{PO}_2^{3-}$
$\text{SO}_5^{2-}$	$\text{SO}_4^{2-}$ Sulfate ion	$\text{SO}_3^{2-}$	$\text{SO}_2^{2-}$
1 more oxygen	"normal"	1 less oxygen	2 less oxygen
